PROJECTS

PORTFOLIO

WEBSITE LINK :

- **Structured Layout:** The portfolio's HTML and CSS design is built on a well-organized structure, employing semantic HTML elements to delineate sections such as introduction, projects, skills, and contact information. This clear layout enhances user experience by facilitating easy navigation and information retrieval.
- **Stylish Presentation:** Leveraging CSS for styling, the portfolio exhibits a cohesive and aesthetically pleasing presentation. Thoughtful color schemes, typography choices, and visual elements are utilized to convey professionalism and creativity, effectively showcasing the individual's skills, projects, and personality to potential employers or clients.

CALCULATOR USING REACT

LINK :

- **Intuitive UI:** React calculator offers a user-friendly interface for easy calculations.
- **Dynamic Features:** Utilizes React's components for real-time calculations and advanced functions.
- **Customizable:** Easily adaptable with state management for personalized features and extensions.

TODO LIST

LINK :

Organized Task Management: The todo list app provides a structured platform for users to manage their tasks efficiently. Through intuitive interfaces, users can easily create, prioritize, and track tasks, ensuring productivity and clarity in their daily routines.
